

Proposed Disposition of AcAB Faculty Survey

1. Recognition of faculty workload: Share with PIC, who is considering a faculty forum on “faculty Workload.” PIC proposes coding the results and doing a frequency analysis. They would then use the main topics as themes for focus groups to more fully characterize the many kinds of work that faculty do to provide students with a “Hope Educational Experience.”
2. Student Assessment of Learning and Teaching (SALT): Share with Assessment Committee
3. Academic scheduling (e.g., course conflicts); Use in spring 2014 by AcAB for its consideration of academic scheduling.
4. Feedback to students:
5. Global learning and diversity education, including off-campus opportunities: Share with International Education Committee.
6. Online Instruction: Share with Academic Computing Committee

The entire survey may be made available to any member of the Hope Community upon request, with the understanding that it is an internal Hope College document and should not be distributed beyond Hope College.
