

## **AcAB – Appendix 1 (2/4/14)**

The **International Education Committee** met on January 9 with President Knapp as its guest. We introduced President Knapp to the role of the committee in the campus governance structure and the sorts of issues we address. We also shared some of our concerns and recommendations regarding international education and global learning in general. President Knapp shared with us his insight into these matters and his vision for international education at Hope. He expects this to be a component of the Strategic Planning initiative and will seek input from the IEC as that process moves forward.
